DESCRIPTION

<u>Project objective:</u>

Use the website link given to you and automate different functionalities for the same. Create a new project and include all the dependencies in the class path. Create a Java class that will contain your automation and test scripts. Run the project using TestNG.

<u>The following used:</u>

- ● Eclipse as the IDE

- ● TestNG

- ● Selenium WebDriver

<u>Following requirements should be met:</u>

- ● Show a registration form, login, search bar, and add-to-cart automation

- ● Handle invalid logins and show appropriate error messages in the console

- Fetch the test reports over HTML or Excel

- Document the step-by-step process involved in completing this task
