app-routing.module.ts

```typescript
import { NgModule } from '@angular/core';
import { RouterModule, Routes } from '@angular/router';
import { AppComponent } from './app.component';
import { SigninComponent } from './myComponents/signin/signin.component';
import { SignupComponent } from './myComponents/signup/signup.component';
import { MainComponent } from './myComponents/main/main.component';
```

```typescript
const routes: Routes = [

  {path:"", component:MainComponent},

  {path:"signin", component:SigninComponent},

  {path:"signup", component:SignupComponent }

];

@NgModule({

  imports: [RouterModule.forRoot(routes)],

  exports: [RouterModule]

})

export class AppRoutingModule { }
```

app.component.html

```html
<app-header></app-header>

<router-outlet></router-outlet>

<app-footer></app-footer>
```

app.module.ts

```typescript
import { NgModule } from '@angular/core';

import { BrowserModule } from '@angular/platform-browser';

import { AppRoutingModule } from './app-routing.module';

import { AppComponent } from './app.component';
```

```typescript
import { SigninComponent } from './myComponents/signin/signin.component';

import { SignupComponent } from './myComponents/signup/signup.component';

import { HeaderComponent } from './myComponents/header/header.component';

import { FooterComponent } from './myComponents/footer/footer.component';

import { MainComponent } from './myComponents/main/main.component';

@NgModule({
  declarations: [
    AppComponent,

    SigninComponent,

    SignupComponent,

    HeaderComponent,

    FooterComponent,

    MainComponent
  ],
  imports: [
    BrowserModule,

    AppRoutingModule
  ],
  providers: [],
  bootstrap: [AppComponent]

export class AppModule { }
```

Make a folder "**myComponents**"

And create five components, named as **header, footer, main, signin, signup.**
